### Clean Up Portland Harbor

Letter

Dr. Ms. McCarthy, The proposed cleanup of the Portland Harbor is a big win for industry and a bad deal for the public. EPA's cleanup proposal tackles just 8% of a site area that is 100% toxic. A more aggressive plan is needed to prevent even more harm to human health and the environment. On behalf of all people who rely on the river for food, recreation, employment and culture, I urge the EPA to implement a plan that: Moves quickly and sustainably reduces contaminants causing harm to Willamette and Columbia River resources. Includes ongoing monitoring and cleanup upriver and downriver from the site. Contributes to healthy fish that are safe to eat for all people. Holds polluters accountable for creating a safer Portland Harbor. These elements get us closer to the plan our communities deserve. And I deserve a clean, safe Portland Harbor. \*Submitted during the comment period between June 9, 2016 to August 8, 2016 regarding the EPA's Portland Harbor Feasibility Study and Proposed Plan.

Seriously? Eight percent? Your offer to clean up only eight percent of the toxic sludge in Portland Harbor, left by decades of irresponsible industries, many of which still exist, would be laughable, if it weren't such a profoundly dangerous insult to the people who live in this area.

If you are incapable of making a seeing through a just and responsible decision to at least attempt to clean up all the sludge, please do the right thing and step down from your position. I'm sure you can get a job with DuPont, or Koch Bros.

Sincerely,

(b) (6)

Portland
